Skills

Technologies

- Python
- Linux
- Git
- AWS
- Bash
- Docker

Characteristics

- Good communication skills
- Higher organized and reliable
- Excellent problem solving skills
- Innovative
- Friendly and helpful attitude
- Good initiative

Experience

Python Developer / CiiVSOFT

APRIL 2019 - FEBRUARY 2020, DARESURY, ENGLAND

My main task was to create, adapt and improve upon existing infrastructure using asynchronous programming, natural language processing and algorithms to compare data sets.

I was also responsible for handling the company's cloud account, security procedures and back-end data processing solutions.

Junior Cloud Engineer / CDL

JUNE 2018 - APRIL 2019, STOCKPORT, ENGLAND

My main responsibility as a cloud engineer was to liaise with development teams to plan and to understand their requirements for developing new cloud based solutions.

I also took up developing automated serverless applications to retrieve infrastructure data from the company's cloud accounts.

Education

BSc (Hons) Forensic Computing / University of Central Lancashire

SEPTEMBER 2015 - MAY 2018, PRESTON, ENGLAND
